ABOUT

I'm Billy, and I'm a problem solver, a team player, and a communicator. I'm excited about all things related to web, engineering, and application development. I've designed online solutions and architected projects of various shapes and sizes while working with different types of businesses. No two projects are the same, therefore I'm constantly improving my abilities, adding new tools to my toolkit, and staying up to date on the latest technologies and best practices.
