

Billy Grossman

ABOUT

Full stack software engineer and technical lead with a strong focus on frontend architecture, user-facing applications, API design, and cloud-based systems. Experienced in ecommerce, CMS platforms, APIs, cloud services, Salesforce integrations, and product-focused web applications. I enjoy solving practical problems, building maintainable software, mentoring developers, and using modern tools, including pragmatic AI-assisted development, to help teams move confidently.

SKILLS

Frontend

Vue.js, Nuxt.js, React, TypeScript, JavaScript, HTML, CSS, SCSS/SASS, responsive UI development, accessibility/WCAG, frontend performance, design systems, component libraries

Backend & Cloud

AWS, S3, API Gateway, Lambda, DynamoDB, AWS SAM, PHP, Python/Flask, Node.js, Express, RESTful APIs, MariaDB, MySQL, MongoDB, Docker, CI/CD workflows

CMS & Platforms

WordPress, Drupal, CMS architecture, content modeling, custom themes, editorial workflows, Salesforce objects, Salesforce API usage, platform integrations

Leadership & Workflow

Technical architecture, Agile/Scrum, stakeholder communication, cross-team dependency management, mentorship, code review, AI-assisted development, LLM tools

EXPERIENCE

InsureMyTrip, Warwick RI — *Lead Software Engineer*

DECEMBER 2019 - PRESENT

- Lead scrum team in project planning, technical decision making, and delivery of business-critical applications
- Provide architecture guidance across frontend, API, and cloud-based systems while remaining hands-on as an individual contributor
- Design and implement maintainable solutions using Vue.js, TypeScript, PHP, Python, MariaDB, AWS, and related technologies
- Act as a liaison to manage cross-team dependencies, align implementation details, and reduce delivery risk

- Regularly meet with stakeholders to prioritize work, clarify requirements, and translate business needs into engineering plans
- Mentor developers through code reviews, technical guidance, and day-to-day support

InsureMyTrip, Warwick RI — *Senior Software Engineer*

SEPTEMBER 2017 - DECEMBER 2019

- Worked in a full stack role using Vue.js, PHP, Python, MariaDB, and JavaScript
- Architected frontend solutions for the company's proprietary ecommerce recommendation engine
- Helped architect and implement solutions to break apart existing monolithic application patterns
- Led developers in building new web applications and ongoing product enhancements
- Mentored junior developers and contributed in Agile Scrum and Kanban environments

Exnihilo Inc., Providence RI — *Senior Web Developer*

JANUARY 2014 - SEPTEMBER 2017

- Rapidly prototyped mobile and web applications using Ionic, AngularJS, Node.js, and MongoDB
- Provided technical recommendations, project input, mentorship, and support for junior developers
- Created demonstrations and proof of concepts for clients while operating under tight deadlines
- Built strong client relationships through project delivery, support, and maintenance work

Bartlett Interactive, Concord MA — *Contract Web Developer*

FEBRUARY 2015 - PRESENT

- Build and maintain Drupal-driven CMS websites and custom web experiences
- Provide estimates, scoping support, mentorship, user training, and client-facing technical support

PROJECTS

Who Goes First, Today? — *Creator & Developer*

PERSONAL PROJECT - LIVE

- Designed and built a small decision-helper web app that makes everyday first-turn decisions easier and more fun
- Created configurable content categories for casual, silly, professional, neutral, kids, and family use cases
- Implemented theme and color mode settings to give a lightweight utility a polished, flexible user experience
- Maintained the project as a live personal product with versioned updates, contact pathways, and share functionality
